

What is wrong with you guys? I thought you were supposed to be all for Freedom and America and the first amendment and all those other patriotic words. I have satellite radio, and I am a working, tax paying, voting American who believes in freedom of choice and freedom of speech and freedom of the press. I subscribe to satellite radio networks because I got tired of hearing same broadcasting from all the local stations, owned by the same one monopoly company, spouting the same news they want me to hear. forget about anything that may be different or interesting. If you are a government commission paid for by my taxes, and you have the power to control what is broadcast to the public, then it is your responsibility to make sure the airwaves are free and not monopolized by the big, conservative media corporations. I see the big broadcasting companies trying to limit my access to information by trying to get you guys to force satellite radio networks off the air. Please, lets keep the big corporations from controlling another part of my life.
